## MOTOR DATA

| Motor                        | Motor                     |                        |                    |
|------------------------------|---------------------------|------------------------|--------------------|
| Nennleistung S1 / [S6] [P]   | Power S1 / [S6]           | kW                     | 8,0/ [12,0]        |
| Nennspannung [U]             | Nominal voltage           | V                      | 380                |
| Nennstrom S1 / [S6] [I]      | Nominal current S1 / [S6] | A                      | 18,0 / [27]        |
| Drehmoment S1 / [S6] [M]     | Torque S1 / [S6]          | Nm                     | 2,55 / [3,80]      |
| Motortyp                     | Motor type                |                        | 3 ph Asynchron     |
| Schaltung                    | Connection                |                        | Y                  |
| Motorpolzahl                 | Number of poles           |                        | 4                  |
| Frequenz [f]                 | Frequency                 | Hz                     | 1.200              |
| Max. Drehzahl [n]            | Max rotational speed      | min <sup>-1</sup>      | 36.000             |
| Min. Drehzahl                | Minimum rotational speed  | min <sup>-1</sup>      | 5.000              |
| Drehrichtung                 | Rotational direction      |                        | rechts / clockwise |
| Beschleunigung / Verzögerung | Acceleration/deceleration | min <sup>-1</sup> /sec | 10.000             |
| Motorschutz                  | Motor protection          |                        | KTY84-130          |

\*Die effektive Spindelleistung steht in Abhängigkeit des verwendeten Antriebsverstärker sowie der eingestellten Antriebsparameter.

\*The spindle performance depends on the used frequency converter and drive parameter settings.

| Drehzahl / Speed           | [n] | 10.000 | 20.000 | 25000 | 30000 | 36.000 | 40000 | min-1 |
|----------------------------|-----|--------|--------|-------|-------|--------|-------|-------|

**Hinweise und Informationen** zur Bedienung und Wartung.  
Bitte beachten Sie unbedingt die Sicherheitsbestimmungen, Hinweise und Informationen im Handbuch!  
Notes and information on operation and maintenance.  
Please be sure to observe the safety regulations, notes and information in the manual!

# ZUBEHÖR

## ACCESSORIES

### Spannmittel

CZER20

Spannzange mit höchster Rundlaufgenauigkeit

CZSMER20

Präzisionsspannmuttern

CZHSKEC32-ER20-55

Präzisions-Spannzangenaufnahme

### Clamping devices

High precisions clamping collets

High precisions clamping nuts

High precisions Collet Chucks

### Anschlusskabel

CZMLBU923OE

Motorkabel mit Stecker und offenem Ende

Hochflexibel

Ölbeständig

Geschirmt

### Connection cable

Motor cable with plug and open end

High flexible

Oil-resistant

shielded

### Frequenzumrichter

CZFU9.7KB – 9,7kVA

CZFU15KB – 15 kVA

Parametriert

Getestet

Sofort Einsatzbereit

### Frequency converter

Parameterised

Tested

Ready for use

### Spindelkühlgerät

CZKG1000

1000W Kühlleistung

42C° Raumtemperatur

Hocheffizient

### Spindle cooling unit

1000W cooling capacity

42C° Ambient temperature

Highly efficient

### Kühlmittel

CZKM100

Hoher Korrosionsschutz

Geringe elektrische Leitfähigkeit

Kein Gefahrgut

### Coolant

High corrosion protection

Low electrical conductivity

No hazardous material

## SERVICE & SUPPORT
